Letter of recommendation for **Mohamed Jouda** (MSc)

Mohamed Jouda participated from 1st September to 31st of October in a 2-month training program in my department to widen his research skills. His supervisor was Dr. Huanhuan Wang.

During this time, he learned to determine the minimal inhibition concentration of new antimicrobial compounds, he isolated cell membrane proteins for interaction studies with Biotin-labeled antibiotic, and learned the Western blotting for protein-protein interaction studies.

Mohamed was very ambitious to learn all the techniques. He has a friendly nature and integrated well into the group.

It is our pleasure to write about Mr. Mohamed M. A. Jouda has joined our institute to participate in research entitled "Pheno- and genotypic studies on bacteria genus Arcanobacterium isolated from marine mammals" from 24. April 2019 to 15. August 2019.

During the aforementioned tenure of his work here, Mr. Jouda has learned many techniques that are used in the identification and diagnosis of bacteria such as MALDI TOF and the identification of the characteristics of the bacteria by biochemical tests. In addition to DNA purification and PCR Assay.

Mr. Jouda remained involved in his work with determination and sincerity. We found him active and competent in executing all assigned tasks. He is professionally sound, hard-working, and a devoted and motivated. He proved to be a committed researcher and exhibited qualities that qualify him to pursue his graduate studies.
